(Temperature Reader)

Registration and Measurement of temperatures

Logger characteristics

- Data Logger Measurement Range: –40ºC a +85ºC.
  - Resolution: **0.5ºC.**
  - Accuracy: **+/– 1ºC.**
- Data Logger Sampling Rate: 1 a 255 minutes.
- Number of measurements that can store: 2048.
- Lifetime minimum: 5 years.
- Dimensions:
      Diameter: 17 mm.
      Thickness: 6 mm.
- Material: Stainless Steel.

The Data Logger Reader – DS 1921 is a software that allows reading and Configuring DS1921 Temperature Loggers.

These data loggers record temperature every time. The user must set the interval (between 1 and 255 min.).

It has a capacity to store temperature data from 2048 with a resolution of 0.5 º C. All data from the temperature are displayed on the main screen and are stored in individual files.

The configuration and reading of the logger is done in less than 30 seconds.

The software allows you to generate the impression of temperature charts and export data from a test to format .PDF or .CSV.

Technical characteristics

- Software of very easy use.
- Save all measurements obtained by the DS1921G Data Logger.
- Generate lists of tests performed.
- You can search tests by:
  - Serial Number product tested.
  - Name of product tested.
  - Serial number Data Logger.
  - Search between dates.
- Allows to export data to CSV (for Excel).
- Allows Export report to PDF files.
- Printing reports with graphs.
- Only authorized personnel can access the settings of
- the software.
- User Manual.
